First Premium Awarded by the Texas State Fair of 1877, the "Arrow Tie" Being One of its Competitors. OFFICE OF J. R. GODWIN & Co., COTTON FACTORS MEMPHIS. TENN., August 24, 1877.

In offering to planters and merchants the Grip Tie, the following advantages are claimed for it: Simplicity of application, greater strength both of the Tie and Band, close adjustment and freedom from slip, which prevents any expansion of the bale, and the impossibility of removing the band without cutportance of these advantages must be evi

importance of putting up heavy bales at plantation presses.

The strength of the Grip Tie is from 2800 to 3000 pounds. The Arrow Tie, from 1800 to 2000 pounds. For compressing cotton bales we effy competition—and this, in the future, is to determine the merit of cotton ties, as the closer the cotton can be compressed the cheaper it can be transported from one point to another.

The recent reduction in the price of Ties was probably due to the competition of the Grip Tie. All are aware that the American Tie Company have for years had a monopoly in the Tie business. This year, however, they are only offering the Arrow Tie. This they have placed in the hands of all dealers with whom they could contract to keep no other Tie in stock, endeavoring thereby to drive out all competition. Therefore, we claim it is to the interest of all consumers of Ties to use the Grip Tie: First, because it is superior in every respect to the Arrow Tie; second, because you are assisting to throw off the shackles of a monopoly.
